

BP Building Permit and Inspection Process¹

Notes

- This process is typical and does not include any zoning processes, any flood prevention requirements, nor any required engineering, utility, erosion control, or stormwater inspections which are outside the Planning & Building Department.
- Septic system permits may be obtained through the Health Department, (260) 248-3121. Erosion control is currently handled by the Soil and Water Conservation District, (260) 244-6266. Other utilities vary by location and jurisdiction; you may contact us for more information.
- Required inspections vary by project, but new construction typically includes the following:

○ Footing	○ Rough plumbing
○ Foundation	○ Rough framing/structural
○ Underslab plumbing	○ Temporary electrical service
○ Underslab mechanical	○ Gas pressure test
○ Slab	○ Electrical service
○ Rough electrical	○ Energy/insulation
○ Rough HVAC	○ Final
